International application No.

PCT/GB 03/01613

I.	<b>Basis</b>	of the	report
----	--------------	--------	--------

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	De	scription, Pages		
	1-4	10	as originally filed	
	Cla	nims, Numbers	2 Alexandro Ros. 69	1144.51
	1-1	9	received on 30.04.2004 with letter of 30.04.2004	
	Dra	awings, Sheets		
	1/1:	3-13/13	as originally filed	
2.	Wit lan	th regard to the <b>lang</b> t guage in which the in	age, all the elements marked above were available or furnished to this Authority in taternational application was filed, unless otherwise indicated under this item.	he
	The	ese elements were av	vailable or furnished to this Authority in the following language: , which is:	
		the language of a tr	anslation furnished for the purposes of the international search (under Rule 23.1(b)).	
		the language of pub	olication of the international application (under Rule 48.3(b)).	
		the language of a translation Rule 55.2 and/or 55	anslation furnished for the purposes of international preliminary examination (under .3).	
3.	Wit inte	h regard to any <b>nucl</b> e ernational preliminary	eotide and/or amino acid sequence disclosed in the international application, the examination was carried out on the basis of the sequence listing:	
		contained in the inte	ernational application in written form.	
		filed together with th	ne international application in computer readable form.	
		furnished subseque	ntly to this Authority in written form.	
		furnished subseque	ntly to this Authority in computer readable form.	
		The statement that in the international a	the subsequently furnished written sequence listing does not go beyond the disclosur application as filed has been furnished.	re
		The statement that the listing has been furn	the information recorded in computer readable form is identical to the written sequentials.	се
4.	The	amendments have r	resulted in the cancellation of:	
		the description,	pages:	
		the claims,	Nos.:	
		the drawings,	sheets:

## Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 1-19 do not meet the requirements of Article 6 PCT in that the matter for which protection is sought is not clearly defined. The claims attempt to define the subject-matter in terms of functional features or parameters, i.e. "agent that attenuates Topoisomerase I activity" and "agent that inhibits Heat Shock Protein 90", which merely amounts to a statement of the underlying problem, without providing the technical features necessary for achieving this result. Although the application gives methods to identify suitable compounds having those functions, and although such methods are also known in the art, the present wording of the claims would also include compounds that have not yet been invented, or that are not known to have this function. The present claims thus lack clarity in the sense of Art. 6 EPC.

### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- Under Rule 66.1(e) PCT, a preliminary examination is not carried out on matter which has not been searched. Therefore, the preliminary examination has been carried out on the parts of claims 1-19 that have been covered by the search, i.e. the parts referring to specific compounds.

- D5: GOLD DV et al, Successful treatment of pancreatic cancer by combined

**EXAMINATION REPORT - SEPARATE SHEET** 

gemcitabine and low dose radioimmunotherapy with 90Y labeled PAM4 antibody. Proceedings of the American Association for Cancer Research, March 2002, Vol. 43, pp. 395f

D6: Fukuda M et al, Synergism betwen Cisplatin and Topoisomerase I inhibitors NB-506 and SN-38 in human small cell lung cancer cells. Cancer Research, 1996, Vol. 56, pp. 789-793.

Documents D3-D6 were not cited in the search report.

#### Novelty 3.

D1 discloses topoisomerase inhibitors (p.1-5) and HSP90 inhibitors (p.23-25), being antineoplastic agent, in the context of an antifungal activity. Since a combination of the two classes of drugs is not suggested by D1 for chemotherapy, claims 1-19, to the extent that they refer to specific compounds that have been covered by the search, are novel over D1.

#### 4. Inventive Step

D3-D6 all refer to the combination of various classes of compounds in the field of chemotherapy. It is a priory not considered to be inventive to combine compounds from two different classes of chemotherapeutic agents, especially since their use in the field is known (see D1, D2).

As far as the synergistic effects are concerned that the applicant shows for the combination of a) irinotecan and geldanamycin or b) irinotecan and radicicol or c) topotecan and geldanamycin, the applicant is reminded that synergistic effects are not predictable and are, per definition, unexpected. Therefore, although the applicant does show a synergistic effect for a specific combinations, this does not imply that other claimed combination for which no synergy has been shown, especially any combination of unspecified compounds defined by mechanisms of actions, would also have such an effect.

Since there is no claim that discloses a specific combination of active compounds for which a synergistic effect has been show, claims 1-19 are not considered to be inventive.

#### 5. Industrial applicability

For the assessment of the present claims 1-19 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of

claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

TOWN TO SERVE THE PROPERTY OF THE PROPERTY OF

## <u>CLAIMS</u>

- 1. A use of a first agent that attenuates Topoisomerase I (Topo I) activity and a second agent that inhibits Heat Shock Protein 90 (HSP90) activity in the manufacture of a medicament for contemporaneous or sequential administration in chemotherapy.
- 2. The use according to claim 1 wherein the first agent is a compound selected from:
  - (i) compounds that bind to Topo I and inhibit its activity;
  - (ii) compounds which prevent the transcription, translation or expression of Topo I;
  - (iii) compounds which inhibit release of Topo I from intracellular stores; and
  - (iv) compounds which increase the rate of degradation of Topo I.
- 3. The use according to claim 1 or 2 wherein the first agent is a cleavable-complex inhibitor.
- 4. The use according to claim 1 or 2 wherein the first agent is Camptothecin.
- 5. The use according to claim 1 or 2 wherein the first agent is Topotecan.
- 6. The use according to claim 1 or 2 wherein the first agent is Irinotecan.
- 7. The use according to claim 1 or 2 wherein the first agent is Camptostar (CPT-11).
- 8. The use according to claim 1 or 2 wherein the first agent is Gemcitabine.
- 9. The use according to any preceding claim wherein the second agent is a compound selected from:
  - (i) compounds that bind to HSP 90 and inhibit its activity;

- (ii) compounds which prevent the transcription, translation or expression of HSP 90;
- (iii) compounds which inhibit release of HSP 90 from intracellular stores; and
- (iv) compounds which increase the rate of degradation of HSP 90.
- 10. The use according to claim 9 wherein the second agent is Geldanamycin.
- 11. The use according to claim 10 wherein the second agent is 17-Allylamino,17-demethoxygeldanamycin (17AAG) or CNF-101.
- 12. The use according to claim 9 wherein the second agent is Radicicol.
- 13. The use according to any preceding claim wherein the chemotherapy is for cancer treatment.
- 14. The use according to claim 13 for the treatment of solid tumours.
- 15. The use according to claim 14 for the treatment of bowel cancer, small cell and non-small cell lung cancer, head and neck cancer, breast cancer, bladder cancer or malignant melanoma.
- 16. The use according to claim 15 for the treatment of paediatric tumours.
- 17. The use according to claim 13 or 16 for the treatment of neuroblastoma, leukaemias and lymphomas.
- 18. The use according to any one of claims 1 12 wherein the chemotherapy is for:

antibacterial treatments; antifungal treatments; antiparasitic treatments; the treatment of AIDS/HIV; UD-UD-≥UU4

the treatment of multiple sclerosis; or the killing and inhibition of proliferation of any organism.

19. The use according to any preceding claim wherein the chemotherapy is for prophylactic treatment.
